

CODE OF FEDERAL REGULATIONS – 40 PROTECTION OF ENVIRONMENT

The Environmental Protection Agency (EPA) is mandated to regulate our air, ground and water quality. It is charged with enforcing The Federal Insecticide, Fungicide & Rodenticide Act (FIFRA) and its regulations.

“§ 152.25 Exemptions for pesticides of a character not requiring FIFRA regulation.

The pesticides or classes of pesticides listed in this section have been determined to be of a character not requiring regulation under FIFRA, and are therefore exempt from all provisions of FIFRA when intended for use, and used, only in the manner specified.

(a) Treated articles or substances. An article or substance treated with, or containing, a pesticide to protect the article or substance itself (for example, paint treated with a pesticide to protect the paint coating, or wood products treated to protect the wood against insect or fungus infestation) if the pesticide is registered for such use.”
